GENERAL

Empathic / Servant Leadership / Humans - not resources

Quick learner / Always curious / Autodidact

T-shaped professional / Polyglot / Fullstack / Devops / SRE

In love with simple boring solutions

In favor of quick iterations with many experiments

Good teams grow organically - Building Teams Organically

LOOKING FOR

A small, tightly knit team

Long-term circle of trust-colleagues

Projects with clear focus

Quick decisions, quick failures, many learnings

Full team responsibility with decision-making power

Real artists ship

You build it - you run it - There's No Such Thing as a "Devops Team"

EXPERIENCE

Aug 2017 - present	**Teamlead / Senior Developer / Hiring manager** *Talon.one*

Golang / Postgres / Kubernetes / SRE / DevOps

** Hightlights - People (Hiring / Onboarding / Mentoring)

Hired and built up a small (4 people) but very capable team for our backend

Provided all needed resources to new members to become productive as quickly as possible

Empowered our team to take full ownership of our application

Facilitated knowledge sharing and encouragement for controlled experiments

Continuously helped improving visibility / stability of the platform

Encouraged / supported responsibility for production within the team

Continuously provided moral support and a safe environment for experimentation within our team

** Highlights - Tech (idea giver / supervisor / reviewer / collaborator)

Realtime streaming data export within constant memory consumption from Postgres

Introduced very fast data importer by using parallel COPY statements from Go into Postgres

Introduced a partitioned tables for logs stored in Postgres to enabled quick old data deletion and faster queries

Infinitely flexible API query parser inspired by the MongoDB query language

Automation for SSL Certificate renewals

Multitenant Kubernetes Deployment automation via internal tools (Elixir)

Kubernetes Operators for Secrets / auto-updating deployments / Database configuration via CRD

Introduced Redash.io for customer data analysis

Internal central logging system based on TimescaleDB (for central visibility)

Split up our integration API tests into parallel chunks to stay consistently below 2 minutes

Encouraged to invest heavily into a very stable CI solution

Mar 2016 - July 2017	**Senior Developer / Teamlead** *Solarisbank AG*

Elixir / Clojure / Ruby / Golang / Docker

Teamlead for the "Credit API" project

Loan application API via mobile UI (Elixir / Phoenix)

administration backend / contract generation / scoring algorithm / core banking system integration

tight focus on TDD and quick turn-around times

Elixir mentoring among fellow developers

integration with multiple third-party financial services

integration with Schufa SOAP interface (Java / Clojure / Elixir)

introduction of Eventsourcing / CQRS in Solarisbank

introduction of fundamental DDD concepts in Solarisbank
